Empowering Transport Technology

UK Delegation to Spain

Following a successful visit to Latvia, Estonia and Finland last year, we will be taking a delegation of ITS UK members to Spain over four days. The delegation will provide delegates with the opportunity to meet government bodies, transport authorities and suppliers from across the three nations, through meetings, site visits, networking opportunities and informal events.

The aim of the visit is to provide the delegation with a greater understanding of the markets across the country and to establish valuable connections between the UK delegation and the Spanish ITS community.

Indicative Itinerary

SUNDAY 24 JANUARY
